

## **OWNER / TENANT RESPONSIBILITIES**

Due to the transient character of many of our residents, it is necessary to create a continuing effort to address problems specific to this element of our city. We desire to inform and educate all citizens, not just the resident populace; especially those moving to and from the city annually. If you are a landlord, you need to make your new tenant aware of this all inclusive program so they feel part of the community and want to participate in reducing crime.

The owner or landlord can do this by:

- (1) Giving the tenant a copy of this booklet.
- (2) Showing them how they can get involved.
- (3) Mention the Crime Watch program.
- (4) Suggest becoming a member of a neighborhood association.
- (5) Discuss the Trash and Garbage Collection section of this booklet and the SWA recycle program

Use the citizens' guide to answer tenant questions about the safety of our city. Remember, this program is bringing together police officers, code enforcement officers, and citizens, individually or as neighborhood groups to "facilitate" solutions to problems within our city. The result will be a better quality of life for all our citizens. We need your support, it can't be done without you.
